The Committee agrees with the conclusions reached by management that no further impairments are required.

The Bidvest Group Limited

Notes to the Company financial statements

for the year ended 30 June

1. Accounting Policies

The financial statements have been prepared in accordance with IFRS® accounting standards, the interpretations adopted by the International Accounting Standards Board (IASB), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and the Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council, the JSE Listings Requirements and in terms of the requirements of the Companies Act of South Africa.

1.1 BASIS OF PREPARATION

The financial statements are prepared on the historical cost basis.

The preparation of financial statements in conformity with IFRS® accounting standards requires the Board of Directors to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Although estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances (the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources), the actual outcome may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Except as detailed below, the accounting policies have been applied consistently to all periods presented in these financial statements. The financial statements are presented in South African Rands, which is the Company's functional and presentation currency.

The Bidvest Group Limited has prepared consolidated financial statements which have been authorised for issue on the same day as these separate financial statements. The consolidated and separate financial statements, in combination, comprise the annual financial statements of the Company as required by the Companies Act of South Africa.

1.2 NEW AND REVISED ACCOUNTING STANDARDS

Accounting standards and interpretations effective for the first time in the 30 June 2026 financial year

Standard / interpretation	Description	Reporting periods beginning on or after
IFRS 7 & IFRS 9: Amendments to the Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7)	These amendments: - clarify the requirements for the timing of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system; - clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (SPPI) criterion; - add new disclosures for certain instruments with contractual terms that can change cash flows (such as some instruments with features linked to the achievement of environment, social and governance (ESG) targets); and - make updates to the disclosures for equity instruments designated at Fair Value through Other Comprehensive Income (FVOCI).	1 January 2026

The adoption of the above new standards didn't have an impact on the company's financial statements.

Standard / interpretation	Description	
Accounting standards and interpretations not yet effective at 30 June 2026		
IFRS 18: Presentation and Disclosure in Financial Statements	The objective of IFRS 18 is to set out requirements for the presentation and disclosure of information in general purpose financial statements (financial statements) to help ensure they provide relevant information that faithfully represents an entity's assets, liabilities, equity, income and expenses. IFRS 18 replaces IAS 1 'Presentation of Financial Statements' and focuses on updates to the statement of profit or loss with a focus on the structure of the statement of profit or loss; required disclosures in the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements (that is, management-defined performance measures); and enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes in general. Many of the other existing principles in IAS 1 are retained, with limited changes. IFRS 18 will not impact the recognition or measurement of items in the financial statements, but it might change what an entity reports as its 'operating profit or loss'. The Company is currently assessing the impact of applying IFRS18. A multi-disciplinary team has been established to plan the transition and determine what effect the requirements of the new standard will have on the existing accounting and reporting framework. Reporting for the year ending 30 June 2028 will be drafted in compliance with IFRS18, and will include compliant comparative information. The transition team is assessing the appropriate classifications of items and reconciliations required to ensure subtotals comply with IFRS18. Other management performance measures and further aggregation and disaggregation requirements are being similarly investigated.	1 January 2027

The Bidvest Group Limited

Notes to the Company financial statements

for the year ended 30 June

1.3 REVENUE RECOGNITION

The Company recognises dividend revenue from its subsidiaries and associates when the right to receive payment is established and can be estimated reliably.

The Company extended a guarantee to the external funders of The Bidvest Group (UK) PLC ("PLC"). PLC is charged a Guarantee fee for the benefit derived from this guarantee. The guarantee fee is recognised in profit and loss annually once the benefit derived from the guarantee can be measured reliably.

1.4 TAXATION

Income taxation comprises current tax. An income tax expense is recognised in profit or loss.

Current taxation comprises tax payable calculated on the basis of the expected taxable income for the year, using the tax rates enacted or substantially enacted at the financial position date, and any adjustment of tax payable for previous years.

1.5 INVESTMENTS IN SUBSIDIARIES

The Company carries its investments in subsidiaries at cost less accumulated impairment losses. The recoverable value of investments are assessed annually, using discounted cashflow models. Where the carrying value exceeds the estimated recoverable amount, such investments are written down to their recoverable amounts. Where the company has made a decision to deregister or liquidate a subsidiary, the investment is written down to its net realisable value. Refer to note 8 for the detailed inputs used in performing the discounted cashflow models.

1.6 ASSOCIATES

An associate is a company over which the Company has significant influence, but not control. Significant influence is the power to participate in the financial and operating policy decisions of a company but has no control over those policies.

The Company carries its investment in associates at cost less any accumulated impairment losses.

1.7 CASH AND CASH EQUIVALENTS

For the purpose of the statement of cash flows, cash and cash equivalents comprise cash on hand and deposits held on call with banks, all of which are available for use by the Company unless otherwise stated.

1.8 EQUITY SETTLED SHARE-BASED PAYMENT RESERVE

The grant by the company of options over its equity instruments to the employees of subsidiary companies is treated as a capital contribution. The share based payment expense is recognised over the vesting period as an increase to investments in subsidiaries, with a corresponding credit to the Equity settled share-based payment reserve.

1.9 DISTRIBUTIONS TO SHAREHOLDERS

Distributions to shareholders are accounted for once they have been approved by the board of directors.

1.10 FINANCIAL INSTRUMENTS

A financial instrument is a contract that gives rise to a financial asset in one entity and a financial liability or equity instrument in another entity. The Company recognises financial assets and financial liabilities at the date when it becomes a party to the contractual provisions of the instrument.

Trade receivables without a significant financing component are initially measured at the transaction price. Other financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Classification and subsequent measurement

The Company classifies financial assets in each of the IFRS 9 measurement categories based on the Company's business model for managing the financial asset and the cash flow characteristics of the financial asset.

The Bidvest Group Limited

Notes to the Company financial statements

1.10 FINANCIAL INSTRUMENTS (*continued*)

Financial assets are classified into the following category:

•Financial assets at amortised cost

A financial asset is measured at amortised cost if the financial asset is held in order to collect contractual cash flows, the contractual terms of the financial asset give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding. Financial assets measured at amortised cost comprise of trade and other receivables, cash and cash equivalents and receivables from group companies. These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by expected credit losses. Interest income, foreign exchange gains and losses and impairments are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss as and when applicable.

In assessing whether contractual cash flows are solely payments of principal and interest, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time for other basic lending risks and costs as well as profit margin. In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of the contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers: contingent events that would change the amount or timing of the cash flows; terms that may adjust the contractual coupon rate, including variable rate features; prepayment and extension features; and terms that limit the Company claim to cash flows from specified assets.

Financial liabilities are classified into the following category:

Financial liabilities are classified as measured at amortised cost using the effective interest method and comprise of, payables to fellow subsidiaries and trade payables.

Derecognition

Financial assets are derecognised when the Company realises the rights to the benefits specified in the contract, the rights expire, or the Company surrenders or otherwise loses control of the contractual rights that comprise the financial asset. On derecognition, the difference between the carrying amount of the financial asset and proceeds receivable are recognised in profit or loss.

Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled or expires. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which a new financial liability based on the modified terms is recognised at fair value. On derecognition, the difference between the carrying amount of the financial liability, including related unamortised costs, and the amount paid for it, is recognised in profit or loss. There were no modifications to financial liabilities during the current or prior financial years.

Impairment

The company applies the general approach for assessing impairments because loans do not fall within the scope of the simplified approach. The general model requires recognising expected credit losses ("ECL") in line with the stage of the financial asset and if there is no significant increase in credit risk ("SICR"), the loss allowance is based on 12-month ECL, alternatively the loss allowance is based on lifetime ECL.

Loans to subsidiaries have no fixed repayment terms, are interest free and therefore payable on demand. If the loan is in stage 1, a fully performing asset, then the loss allowance can be calculated as a 12-month ECL. Twelve-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of an instrument is less than 12 months). Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

ECLs are probability weighted averages on credit losses with the likelihood of the respective defaults occurring as the weighting. Three elements are considered:

- Probability of default ("PD") – is the percentage likelihood that the borrower will not be able to repay its debt within some period.
- Loss given default ("LGD") – is the percentage that could be lost in the event of a default by the borrower not paying its debt (principal and interest).
- Exposure at default ("EAD") – is the outstanding balance of the loan – how much the company is owed at balance sheet date.

The qualitative factors considered when assessing whether or not there has been a SICR included:

- adverse forecasts for the subsidiaries' operating results;
- evidence of working capital deficiencies or liquidity problems in subsidiaries, which could be the result of financing or cash management decisions taken by the company;
- changes in the enterprise values of the underlying operations and indicators of decline in values.

Under a 12-month ECL scenario, the impairment loss is limited to the effect of discounting the amount due on the loans at the effective interest rate (present value). Since the effective interest rate is 0% and all strategies indicate that the company would fully recover the outstanding balance of the loan, discounting would have no impact on the ECL. However, forward-looking information, in the form of forecasted operating results for the fellow subsidiary is also considered.

The Company adopts a repayment 'over time' strategy for loans advanced which could be recovered in a number of ways:

- adjusting dividend declarations by subsidiaries; and
- refinancing or extensions of funding facilities.

The company has assessed the loans receivable from group companies and noted no material impairments given the low probability of default.

The credit rating of the financial institutions where cash and cash equivalents are held are considered to identify whether there has been a significant increase in credit risk. Where the institution has a healthy credit rating that has not been adjusted downwards due to institution specific factors, it is an indication that credit risk has not increased. Refer to note 11 for a list of banks that the Company deals with, as well as their credit ratings.

1.11 SIGNIFICANT ESTIMATES AND JUDGEMENTS

The Board of Directors has considered the Company's critical accounting policies, key sources of uncertainty and areas where critical accounting judgements were required in applying the Company's accounting policies.

Critical accounting policies

The Group Audit Committee is satisfied that the critical accounting policies are appropriate to the Company.

Key sources of uncertainty

The following key sources of uncertainty have been identified:

Investments in subsidiaries

The Company has assessed the carrying value of Investments in subsidiaries to determine whether any of the amounts have been impaired. The recoverable values were assessed using the greater of value-in-use and fair value less cost to sell methods based on actual results and forecasts for future years (refer note 8. Investment in subsidiaries).

Critical accounting judgements in applying the Company's accounting policies

Judgements made in the application of IFRS accounting standards that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Judgments and estimates used in assessing the impairment of investments in subsidiaries are elucidated in note 8. Investments in subsidiaries.

8. Investments in subsidiaries (continued)

Investments in subsidiaries are firstly considered for impairment with reference to their net asset values. If this method indicates an impairment risk, the recoverable amount is determined using the greater of value-in-use and fair value less cost to sell based on actual results and forecasts for future years. A five year discounted cash flow ("DCF") is performed with the below inputs used in this assessment:

There have been no significant judgements in determining whether or not the entity controls the underlying entities and no significant Non-controlling interest (NCI) exists, and no restrictions on access to rights to assets exist.

Macro-economic pressure impacting consumers has led to a further downturn in sales volumes and overall profitability in Home of Living Brands Holdings Pty Ltd in the current financial year. The future forecasts were rebased, considering current circumstances and future opportunities, which also necessitated an adjustment to the growth rates applied in the DCF. The valuation resulted in an additional R30.6 million impairment.

A 1% increase or decrease in the variables used in the Home of Living Brands Holdings Pty Ltd impairment calculation in the current year has the below impact on the impairment assessment:

	Increase (decrease) in equity value due to a 1% increase in rate	Increase (decrease) in equity value due to a 1% decrease in rate
Growth rate	20,190,158	(18,580,900)
Terminal growth rate	20,900,772	(16,438,952)
Discount rate	(31,392,206)	38,785,658

A similar sensitivity analysis was performed for all other investments which did not result in a significant impact.

Cost less accumulated impairment are disclosed for material subsidiaries as required in terms of IFRS accounting standards.

[^] - 2025 pre-tax discount rates were impacted by significant decrease in risk free rates.

14. Share-based payments

The Bidvest Share Incentive Scheme (BIS) grants options to employees of the Group to acquire shares in the Company. The share options scheme has been classified as an equity-settled scheme, and therefore an equity-settled share-based payment reserve has been recognised.

The Bidvest Group Share Appreciation Rights (SARs) Plan was adopted, in 2016, to replace the BIS and has been classified as an equity-settled scheme, therefore an equity-settled share-based payment reserve has been recognised. Executive directors do not participate in the SARs Plan.

A Conditional Share Plan (CSP), which awards executive directors with a conditional right to receive shares in the Company, free of any cost, is also operated by the Group. As it is anticipated that the participants will receive shares in settlement of their awards, a share-based payment reserve has been recognised.

Replacement rights scheme (previously share option scheme)

Following the unbundling of Bidcorp (30 May 2016), Bidvest option holders exchanged each one of their existing options for one right over one Bidcorp share and one Bidvest share (replacement right). In terms of the amended scheme rules, the original option price was not adjusted, but on exercise of the replacement right, the original option price will be deducted from the combined value of the Bidcorp share and the Bidvest share. The vesting date and lapse dates of the replacement rights will be the same as those of the original options.

The terms and conditions of the replacement rights are:

- Replacement right holders are only entitled to exercise their rights if they are in the employment of the Group in accordance with the terms referred to hereafter, unless otherwise recommended by the Board of the Company to the Trustees of the Bidvest Share Incentive Trust;
- replacement right holders may exercise the rights at such times as the right holder deems fit, but not so as to result in the following proportions of the holder's total number of instruments being purchased prior to: 50% of total number of instruments at the expiry of three years; 75% of total number of instruments at the expiry of four years; and 100% of total number of instruments at the expiry of five years from the date of the holder's acceptance of an option; and
- all rights must be exercised no later than the 10th anniversary on which they were granted unless approval is obtained from the trustees of the Bidvest Share Incentive Trust. The expiry date of the remaining 72 350 replacement rights has been extended by 12 months to 11 December 2026.

The number and weighted average exercise prices of replacement rights are:

	2026		2025

Beginning of the year	80,688	301.54	129,788	291.02

The replacement rights outstanding at 30 June 2026 have an award price of R301,54 (2025: R301,54) and a weighted average contractual life of 0,4 (2025: 0,4) years. The average combined value of the Bidvest and Bidcorp shares during the year was R658.55 (2025: R704.74).

The fair value of services received in return for shares granted is measured based on a modified Black Scholes model. The contractual life of the replacement right is used as an input into this model.

Share Appreciation Rights Plan

The terms and conditions of the SARs Plan are:

- SAR holders are only entitled to exercise their rights if they are in the employment of the Group in accordance with the terms referred to hereafter, unless otherwise recommended by the Board of the Company to the Trustees of the Bidvest Share Incentive Trust.
- SAR holders in the Scheme may exercise the SARs at such times as the holder deems fit, but not so as to result in the following proportions of the holder's total number of instruments being purchased prior to: 50% of total number of instruments at the expiry of three years; 75% of total number of instruments at the expiry of four years; and 100% of total number of instruments at the expiry of five years from the date of the holder's acceptance of an appreciation right; and
- all SARs must be exercised no later than the 7th anniversary on which they were granted unless approval is obtained from the trustees of the Bidvest Share Incentive Trust.

Conditional share plan

In terms of the CSP scheme, a conditional right to a share is awarded to executive directors and officers subject to performance and vesting conditions. The vesting period is as follows: 75% of total number of awards vest at the expiry of three years and 25% of total number of awards vest at the expiry of four years from the date of the award, unless otherwise determined by the Board. These share awards do not carry voting rights attributable to ordinary shareholders.

The fair value of services received in return for the conditional share awards has been determined by multiplying the number of conditional share awards expected to vest, by the share price at the date of the award less discounted anticipated future distribution flows. A total number of 1 728 395 (2025: 1 392 835) of the 2 195 890 (2025: 1 919 183) shares are expected to vest, taking into account the performance of the Group to date and forecasts to the end of the performance period, against the targets set at the time of the award. The average discounted share price used in the calculation of the share-based payment charge on the conditional share awards granted during the year is R197.594(2025: R248.51) per share. These awards will vest in the next three years.

69 716 (2025: 26 170) conditional share awards were forfeited as a result of performance conditions not being met, 79 986 (2025: 88 089) conditional share awards were forfeited as a result of retirement or resignation.

The number of conditional share awards in terms of the conditional share plan are:

	2026 Number	2025 Number
Beginning of the year	1,919,183	1,789,341
Granted during the year	893,500	694,900
Awarded during the year	(458,277)	(436,089)
Awarded during the year as result of accelerated vesting	(8,814)	(14,710)
Forfeited during the year	(149,702)	(114,259)
End of the year	2,195,890	1,919,183

The maximum number of shares which may be allocated at any one time under the Replacement Rights, SAR and existing Conditional Share Plan shall not exceed 16 750 000 shares (5% of shares in issue). Based on the closing price the Bidvest and Bidcorp share prices at 30 June 2026, it is estimated that 4 700 000 (2025: 4 000 000) Bidvest ordinary shares would be required to settle the Group's share-based payment obligations.

The company's risk management is predominantly controlled by the requirements of The Bidvest Group Limited ("Group") board of directors.

The Company considered the following risks from its use of financial instruments: credit risk and liquidity risk.

17.2 Credit risk

Credit risk is the risk of default on a loan receivable due to a borrower failing to make required payments on the loan. The loans receivable are subject to the expected credit loss model. The company applies the general model approach for assessing the impairments because the loans do not fall within the scope of the simplified approach. Refer to accounting policy 1.10 - Impairment for considerations in this regard.

Based on the above considerations management concluded that no adjustment to the expected credit loss allowance in respect of amounts owing by Group companies was required in the current financial year.

Credit risk resulting from bank balances are considered to be low, the Company and Group only transacts with reputable local and international banks. Refer to note 11 for the credit ratings of banks that the Company and Group have relationships with.
